

POWER SOURCES

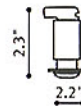

RP-1

C.U.L. Listed. Recessed plug-in unit for accessible ceiling, 50 Watt max. White only.

Use with a remote transformer. (To minimize voltage drop locate fixtures as close a possible to transformer.)

When wired in a "Run" maximum wattage is 150W.

One fixture per unit head. Use a magnetic low-voltage dimmer only.

RP-1 NUL

Non-U.L. Recessed plug in unit for ceiling or wall with no access. 50 Watt max. White or Black.

Use with a remote transformer. (To minimize voltage drop locate fixtures as close as possible to transformer.)

When wired in a "Run" maximum wattage is 150W.

One fixture per unit head. Use a magnetic low-voltage dimmer only.

REMOTE STATION 1

Low profile canopy with one outlet. 50 Watt max. White or Anthracite.

Use with a remote transformer. (To minimize voltage drop locate fixtures as close as possible to transformer.)

When wired in a "Run" maximum wattage is 150W.

One fixture per unit head. Use a magnetic low-voltage dimmer only.

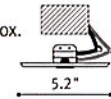

REMOTE STATION 2

Low profile canopy with one outlet. 50 Watt max. White or Anthracite.

Shipped complete with a 50 Watt electronic low-voltage transformer to be installed in a 2.125" deep junction box.

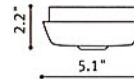

One fixture per unit head. Use a magnetic low-voltage dimmer only.

CENTRAL STATION

Canopy with 50 Watt integral toroidal transformer with one outlet plug. White or Anthracite.

One fixture per unit head. Use a magnetic low-voltage dimmer only.

UNI TRACK ADAPTER

UNI-L50 50 Watt transformer mounts to Lightolier, Lytespan Track.

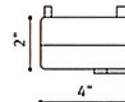

UNI-H50 50 Watt transformer mounts to Halo, Power-trac Track.

UNI-J50 50 Watt transformer mounts to Juno, Trac-Master, Track.

White or Black. One fixture head per UNI track adapter (excluding RA 1/2).

For use on single circuit track, Two circuit track will recognize first circuit only.

Use Leviton incandescent dimmer only.

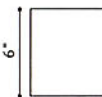

TRANSFORMERS

150W REMOTE TRANSFORMER

U. L. Listed remote transformer, overcurrent protection provided. (L 6 in. x W 6 in. x H 6 in.)

Locate remote transformer as close as possible to fixture head to minimize voltage drop and reduce light output.

Use a magnetic low-voltage dimmers only.

50W REMOTE TRANSFORMER

Non-U. L. remote transformer, overcurrent protection provided. (L 5.2 in. x W 4.7 in. x H 3.2 in.)

Locate remote transformer as close as possible to fixture head to minimize voltage drop and reduce light output.

Use a magnetic low-voltage dimmers only.
