candle lantern (not yet available)			FCL-C1	candle lantern (fritted) (not yet available)			FCL-F1

**float glassware** is made from the finest quality German borosilicate glass, which is hand blown in the Czech republic by master glassblowers. Float glass is shock resistant to extreme heat and freezing cold, thus allowing for use with both hot and cold beverages. The tea lantern is a double walled vessel, acting as a thermos to insulate the hand from the heat of the tea. Each of the drinking glasses has been designed with a suspended bowl to insulate from the hand and make the use of a coaster unnecessary.
